Plan Services

Introduction

Public Works Advisory's (PWA) Heritage Asset Advisory team manages the Plan Services function by providing retrieval of digitised PDF files of more than 700,000 drawings of public buildings and other infrastructure constructed by or through the former NSW Public Works over the last 200 years. Approximately 75% are architectural and engineering services drawings and 25% are drawings of the State's major infrastructure (e.g. dams, sewerage schemes, bridges) and environment (e.g. rivers, harbours, reservoirs). These resources are for anyone interested in relevant government asset upgrades, compliance and maintenance works.

We are raising awareness more widely within government, industry and the public that this important repository of building asset information is available. Our recent survey indicated a substantial acknowledgement, considerable ongoing demand and continuing need for this service.

These resources are available to state and local government agencies, private sector consultants, heritage and building researchers, building trades and installation contractors, new asset owners and the general public.

Viewing of plans prior to ordering

If required drawings can be viewed by prior arrangement with Plan Services at PWA's office. We are currently operating from 66 Harrington St, The Rocks, Sydney 2000. From Mid-February 2020 we will operate from our new office at 4 Parramatta Square, Parramatta, NSW 2150.

Fee schedule for Public Works drawings

Volume of drawings requested per enquiry	Fee
Search only	\$25 flat fee
1 - 9	\$20 each + \$50 flat fee
10 - 35	\$15 each + \$50 flat fee
35 or more	\$10 each + \$50 flat fee

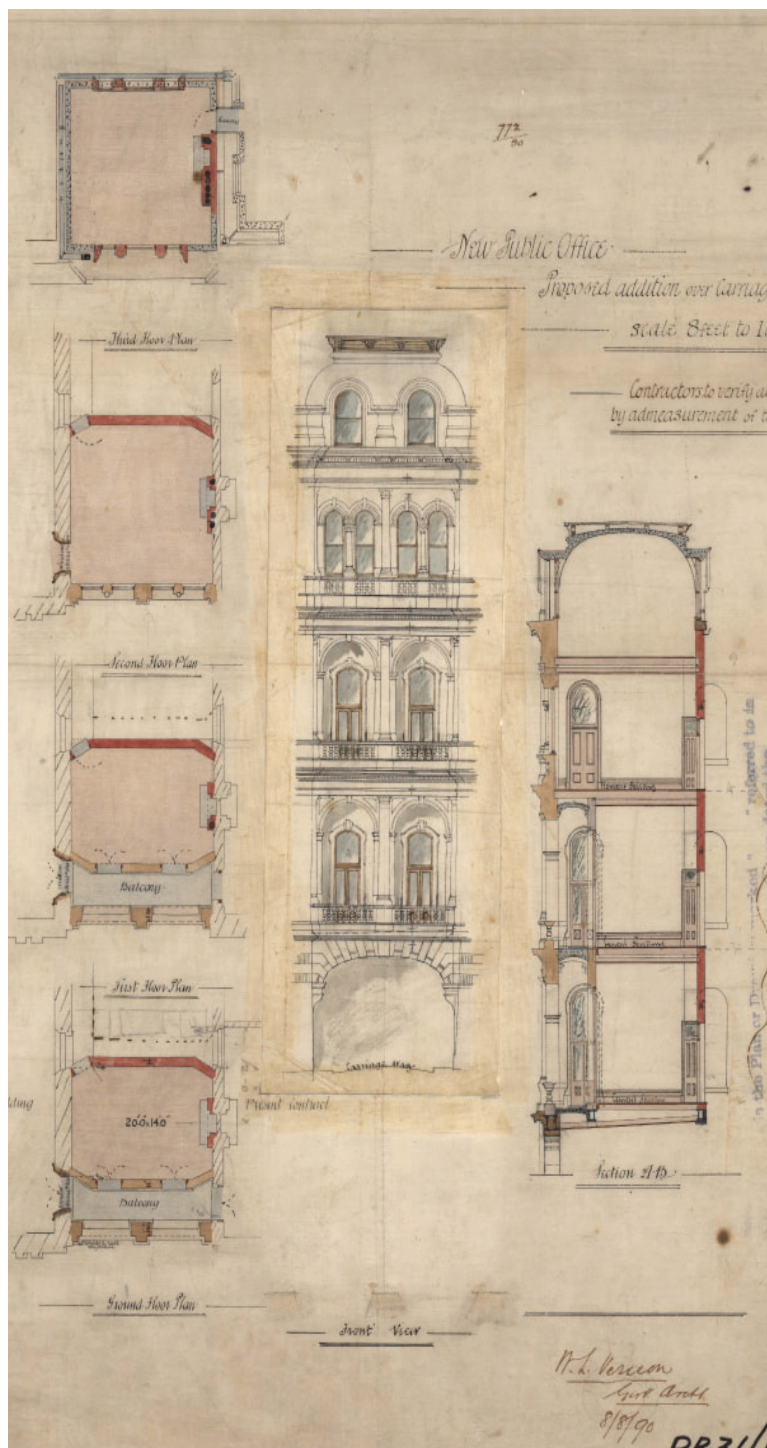

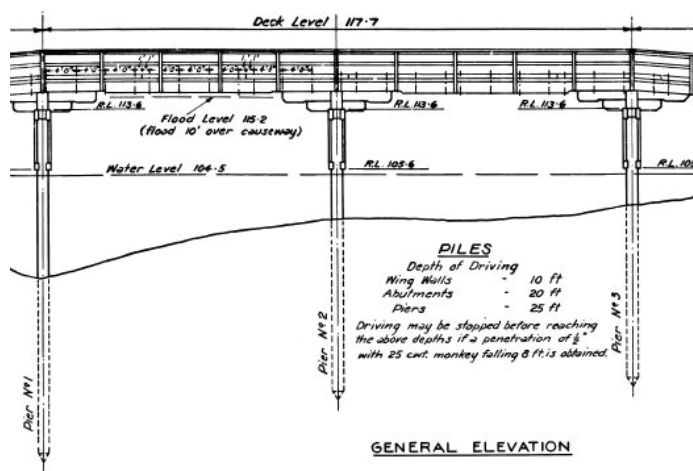

Note: The above prices may be amended at any time.

Payment method

The scalable fee for provision of the selected PDF's will be quoted and then relevant costs required to be paid by credit card (from January 2020) before the relevant drawings are released to the requestor. Drawings may require security and building owner authorisation before release will be granted.

Other services

Plan Services also manages approximately 25,000 sets of the CAD drawings collection of the former NSW Public Works. These drawings are of projects from the 1980's to 2016. Through a similar process, these drawings will be made available in mid to late 2020.
